## • WORK EXPERIENCE

**Company: Zensar Technologies** - April 2016 to Present

## Projects worked on:

### 1) For Client: Experian Da Accessible UI (Foolproof's client (<http://www.foolproof.co.uk/>))

**Location:** Bengaluru

**Duration:** Oct-2018 to Present

**Role:** UI developer and Accessibility evaluator

**Foolproof** is an experience design agency based in England and is a part of global technology company Zensar. **Experian** being one of the top clients of Foolproof is a global leader in consumer and business credit reporting and marketing services.

#### Responsibilities:

- Understanding the role of accessibility in websites in general.
  - Understanding the client requirements and expectations on accessibility in a given crunched time.
  - Developing by concentrating on the legibility in font size, shapes, hues and colour contrast on the front-facing elements and the correct ARIA compliance code in the back-end - this is so assistive technology, like screen readers, can offer a practical and functional experience.
  - Performing Accessibility testing on the developed site using JAWS computer screen reader and Dragon Speech recognition software.
- 

### 2) For Client: Kohl's (US)

**Location:** Bengaluru

**Duration:** Feb-2017 to Sep-2018

**Technologies:** HTML, CSS, Javascript, JQuery, JS-Render, KJS(Kohl's Javascript), NodeJS

**Role:** UI designer and developer

#### Project Overview:

#### Responsibilities:

- Playing a key role in analysing of requirements, converting design mock-ups into real world UI screens with functionality.
  - Creating quality UI according to specifications mentioned in Zeplin.
  - Modification and maintenance of data analytics at page level.
  - Unit testing and system integration testing of the developed code. Providing fixes to the issues identified in testing phase.
- 

### 3) For Client: Liverpool MX

**Location:** Bengaluru

**Duration:** Sep 2016 – Jan 2017

**Technologies:** HTML, CSS, Bootstrap, Javascript, JQuery, ATG, JSP templating

**Role:** UI designer and developer

**Responsibilities:**

- Analysis of gathered requirements, understanding UI layouts and formations.
- Creating UI design mock-ups based on specified design requirements.
- Unit testing and validation of functionalities and bugs.

## • INDEPENDENT DESIGN PROJECTS

### 1) Home food delivery system based on subscriptions: July 2018 – Present

**Task:** Creating a web based application for food delivery system based on subscription.

Currently working on the B2C level of the application.

Working on forming the case study: Wireframes - <https://invis.io/Z407ES1VBNW>

---

### 2) Leave manager mobile application: May 2018-June 2018

**An internal Zensar project:**

**Task:** To create a mobile application for leave management system.

Worked as a UI/UX designer: from user research, intercept interviews, storyboarding, different ways of prototyping, wireframing, creating low and high fidelity screens.

Case study: <https://www.uxfol.io/project/04ecc82b/Leave-Manager-App>

## • COURSES AND CERTIFICATES

On-going 7 courses Specialization on Interaction Design from The University of California San Diego (Completed 6 of them with highest grades). Please refer to my LinkedIn profile for certification details.

On completion of this course, I would be working on a capstone project in association with Instagram.

## • EDUCATION

- BE in Information Science with aggregate of 76% completed in St Joseph Engineering College (under VTU Belgaum), Mangalore, Karnataka (2011-2015)
- 12<sup>th</sup> State board Completed with 89% from Vivekananda Pre-University College, Puttur, Karnataka (2009-2011)

## • HOBBIES

Professional skills in pencil sketching, abstract drawing, doodling, oil painting, singing and solo travelling.
